What Should I Get?

SimpliSafe lets you custom-build your own system, but what is the right mix of components for your house? Ask the community [here](#)

Does any of my data (camera/microphones) go via a SimpliSafe server?

Hi dannyaustin,

Yes, all of the camera data, including your videos, do go through our servers. This goes for both videos saved in the cloud, as well as your livestreams. But please don't worry. All of that data is encrypted both in transit and at rest, and is fully locked down so that nobody, not even our own employees, can access without your permission.
